

# What is Data Science

Data Science: Jordan Boyd-Graber University of Maryland

## What you need for this course

- You need to use Python
- Helps to have a laptop to bring to class
- Math background
  - Logarithms, Exponents
  - Take derivatives
  - Algebraic manipulation
- Computer / programming skills
  - Must know how to program
  - Manipulate data (text files)
  - Algorithms relatively simple

## **Classroom Style**

- Hands-on practice
- Lectures: do reading, ask questions
- Labs: you help each other, and we work through examples

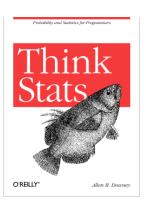

#### **Administrivia**

- Keep track of course webpage
- Homeworks: 5 late days
- Midterm
- Final
- Let me know about special needs

#### Administrivia

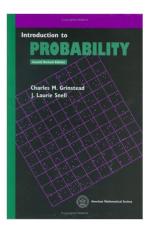

- Keep track of course webpage
- Homeworks: 5 late days
- Midterm
- Final
- Let me know about special needs
- Read the syllabus!
  - Grade breakdown
  - Policies on lateness beyond free late days

## Course reading

- We will provide reading materials, mostly from the book.
- Slightly different focus: same concepts, use book as starting point

## Course reading

- We will provide reading materials, mostly from the book.
- Slightly different focus: same concepts, use book as starting point
- Statistics will be from suggested book

## Communicating with Piazza

We will use Piazza to manage all communication

http://piazza.com/colorado/fall2016/csci3022

- Questions answered within 1 day (hopefully sooner)
- Hosts discussions among vourselves
- Use for any kind of technical question
- Use for most administrative questions
- Can use to send us private questions too
- Will be a factor in participation

## How to ask for help

- Explain what you're trying to do
- Give a minimal example
  - Someone else should be able to replicate the problem easily
  - Shouldn't require any data / information that only you have
- Explain what you think should happen
- Explain what you get instead (copy / paste or screenshot if you can)
- Explain what else you've tried

#### Me

Seventh year assistant professor

Office: 111B FCCS

Was formerly a professor at University of Maryland

Research: topic models, question answering, machine translation

First time teaching **this** class (taught several related courses)

Born in Colorado (where all my family live)

Grew up in Iowa (hometown: Keokuk, Iowa)

Went to high school in Arkansas

Undergrad in California

Grad school in New Jersey

Brief jobs in between:

Working on electronic dictionary in Berlin

Worked on Google Books in New York

ying / jbg / jordan / boyd-graber

ata Science: Jordan Boyd-Graber | UMD What is Data Scien

human	evolution	disease	computer
genome	evolutionary	host	models
$_{ m dna}$	species	bacteria	information
genetic	organisms	diseases	data
genes	life	resistance	computers
sequence	origin	bacterial	system
gene	biology	new	network
molecular	groups	strains	systems
sequencing	phylogenetic	$\operatorname{control}$	model
$_{\mathrm{map}}$	living	infectious	parallel
information	diversity	malaria	methods
genetics	group	parasite	networks
mapping	new	parasites	software
project	two	united	new
sequences	common	tuberculosis	simulations

# Tea Party in the House

Data Science: Jordan Boyd-Graber | UMD What is Data Science | 9 / 11

#### Who's who

- Michael Paul: authoring slides (don't bug him!)
- Pedro Rodriguez: concept help (do bug him!)
- Apoorva Bapat: grader (homework grades only)

### **Next time**

- Data wrangling
- LAB! (Bring laptop)
- Subject of first homework
